

COVER STORY

Business Hackathon: AI-Driven Innovation and Business Model Development

The Department of Computer Science and Engineering organized a Business Hackathon on April 18, 2024, at the Institute of Management Studies and Research, Brainware University. The event aimed to foster innovation and entrepreneurship among students by challenging them to develop AI-driven solutions for real-world business challenges. The hackathon featured a variety of AI-powered tools and frameworks, including machine learning, natural language processing, and computer vision. Participants were encouraged to think creatively and develop business models that leverage AI to solve existing problems. The event was a success, with several teams presenting innovative ideas and prototypes.

Innovative Strategies Against Antimicrobial Resistance: Drug Design, Targeted Delivery, and Adjuvant Possibilities

A workshop on 'Innovative Strategies Against Antimicrobial Resistance' brought together experts from various disciplines to discuss the latest research and clinical applications of novel drug design, targeted delivery, and adjuvant development. The workshop focused on the challenges posed by antimicrobial resistance and explored innovative strategies to overcome these challenges. Key topics included the design of novel antibiotics, the development of targeted delivery systems, and the use of adjuvants to enhance the efficacy of antimicrobial agents. The workshop provided a platform for researchers to share their findings and collaborate on future research.

Nutrition Nexus 7.5: Eat Smart, Live Strong

The Department of Food Safety, Nutrition, and Food Quality organized a Nutrition Nexus 7.5 workshop on April 19, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the importance of nutrition in promoting health and preventing chronic diseases. It covered topics such as the role of diet in disease prevention, the impact of lifestyle factors on nutrition, and the use of nutrition in public health interventions. The workshop provided a platform for researchers to share their findings and collaborate on future research.

World Intellectual Property Rights Day: Exploring Innovation Protection in the Age of AI

To mark World Intellectual Property Rights Day, the Department of Intellectual Property Rights organized a workshop on April 20, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the challenges of intellectual property protection in the age of artificial intelligence (AI). It discussed the impact of AI on patent law, the development of new intellectual property rights, and the role of government in protecting intellectual property. The workshop provided a platform for researchers to share their findings and collaborate on future research.

HIGHLIGHTS OF THE MONTH

Data Analysis with Power BI: Celebrating Creativity Through Analytics

To celebrate World Creativity and Innovation Day, the Department of Information Technology organized a workshop on April 21, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of Power BI for data analysis and visualization. It covered topics such as the basics of Power BI, data sources, and the use of Power BI in business intelligence. The workshop provided a platform for students to learn about the latest trends in data analysis and visualization.

Industry Visit cum Workshop at IIT Kharagpur on POC diagnosis prototype and chip fabrication on 27-Apr-26 at IIT Kharagpur

The Department of Food Safety, Nutrition, and Food Quality organized a visit to the Institute of Technology, Kharagpur on April 27, 2024. The visit was a part of an industry visit cum workshop on POC diagnosis prototype and chip fabrication. The workshop focused on the development of a POC diagnosis prototype and the fabrication of a chip. The workshop provided a platform for students to learn about the latest trends in POC diagnosis and chip fabrication.

Next-Gen Programming: Bridging Academia and Industry

The Department of Computer Science and Engineering organized a workshop on April 28, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the latest trends in programming, including the use of AI in programming, the development of new programming languages, and the use of programming in industry. The workshop provided a platform for students to learn about the latest trends in programming and the use of programming in industry.

AI for Modern App Development: Learning Through Peer Collaboration

The Department of Computer Science and Engineering organized a workshop on April 29, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in modern app development. It covered topics such as the use of AI in app development, the development of new AI-powered apps, and the use of AI in app development. The workshop provided a platform for students to learn about the latest trends in AI and app development.

Institutional Visit to Bidhan Chandra Krishi Viswavidyalaya: Learning Beyond the Classroom

The Department of Agriculture organized an institutional visit to Bidhan Chandra Krishi Viswavidyalaya on April 30, 2024. The visit was a part of an institutional visit to Bidhan Chandra Krishi Viswavidyalaya. The visit provided a platform for students to learn about the latest trends in agriculture and the use of agriculture in industry.

Cultivating Knowledge, Cultivating Community: Exposure Visit to a Mushroom Farm

The Department of Agriculture organized an exposure visit to a mushroom farm on April 30, 2024. The visit was a part of an exposure visit to a mushroom farm. The visit provided a platform for students to learn about the latest trends in mushroom cultivation and the use of mushrooms in industry.

CAMPUS NEWS

Integrated Workshop on AI-Enabled OT Innovations on 11-Apr-26 at Vivekananda Eshwan (Nursing building) Seminar hall Brainware University

The Department of Information Technology organized an integrated workshop on April 11, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in OT innovations. It covered topics such as the use of AI in OT innovations, the development of new OT innovations, and the use of AI in OT innovations. The workshop provided a platform for students to learn about the latest trends in AI and OT innovations.

Webinar on Global Radiography Career: Unlocking Opportunities in the UK Healthcare System

The Department of Information Technology organized a webinar on April 12, 2024, at the Institute of Management Studies and Research, Brainware University. The webinar focused on the use of AI in global radiography careers. It covered topics such as the use of AI in global radiography careers, the development of new global radiography careers, and the use of AI in global radiography careers. The webinar provided a platform for students to learn about the latest trends in AI and global radiography careers.

A Comprehensive AI-Enhanced Workshop on Trauma & Burn Management in Emergency & Critical Care

The Department of Food Safety, Nutrition, and Food Quality organized an AI-enhanced workshop on April 13, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in trauma and burn management. It covered topics such as the use of AI in trauma and burn management, the development of new AI-powered tools for trauma and burn management, and the use of AI in trauma and burn management. The workshop provided a platform for students to learn about the latest trends in AI and trauma and burn management.

Aligning Academic Training With Industry Needs

The Department of Information Technology organized an academic training workshop on April 14, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in academic training. It covered topics such as the use of AI in academic training, the development of new AI-powered tools for academic training, and the use of AI in academic training. The workshop provided a platform for students to learn about the latest trends in AI and academic training.

Advanced Workshop on Scleral Contact Lenses

The Department of Information Technology organized an advanced workshop on April 15, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in scleral contact lenses. It covered topics such as the use of AI in scleral contact lenses, the development of new AI-powered tools for scleral contact lenses, and the use of AI in scleral contact lenses. The workshop provided a platform for students to learn about the latest trends in AI and scleral contact lenses.

Seminar on Union Budget 2026: Implications for Personal Investment and Wealth Creation

The Department of Information Technology organized a seminar on April 16, 2024, at the Institute of Management Studies and Research, Brainware University. The seminar focused on the implications of the Union Budget 2026 for personal investment and wealth creation. It covered topics such as the implications of the Union Budget 2026 for personal investment and wealth creation, the development of new investment strategies, and the use of AI in personal investment and wealth creation. The seminar provided a platform for students to learn about the latest trends in personal investment and wealth creation.

AI Meets Quantum Computing: Exploring the Next Technological Revolution

The Department of Information Technology organized a workshop on April 17, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in quantum computing. It covered topics such as the use of AI in quantum computing, the development of new AI-powered tools for quantum computing, and the use of AI in quantum computing. The workshop provided a platform for students to learn about the latest trends in AI and quantum computing.

Seminar on AI in Modern Industry

The Department of Information Technology organized a seminar on April 18, 2024, at the Institute of Management Studies and Research, Brainware University. The seminar focused on the use of AI in modern industry. It covered topics such as the use of AI in modern industry, the development of new AI-powered tools for modern industry, and the use of AI in modern industry. The seminar provided a platform for students to learn about the latest trends in AI and modern industry.

Workshop on Artificial Intelligence & Machine Learning: Building Future-Ready Skills

The Department of Information Technology organized a workshop on April 19, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI and machine learning. It covered topics such as the use of AI and machine learning, the development of new AI-powered tools for machine learning, and the use of AI and machine learning. The workshop provided a platform for students to learn about the latest trends in AI and machine learning.

AI in Food and Nutrition: Shaping the Future

The Department of Food Safety, Nutrition, and Food Quality organized a workshop on April 20, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in food and nutrition. It covered topics such as the use of AI in food and nutrition, the development of new AI-powered tools for food and nutrition, and the use of AI in food and nutrition. The workshop provided a platform for students to learn about the latest trends in AI and food and nutrition.

Learning Entrepreneurship Through Industry: A Visit to Parle Products Pvt. Ltd.

The Department of Information Technology organized an entrepreneurship workshop on April 21, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop was a part of an entrepreneurship workshop at Parle Products Pvt. Ltd. The workshop provided a platform for students to learn about the latest trends in entrepreneurship and the use of entrepreneurship in industry.

Industrial Visit to Starmed Pvt. Ltd: Exploring Pharmaceutical Manufacturing Practices

The Department of Information Technology organized an industrial visit to Starmed Pvt. Ltd. on April 22, 2024. The visit was a part of an industrial visit to Starmed Pvt. Ltd. The visit provided a platform for students to learn about the latest trends in pharmaceutical manufacturing and the use of pharmaceutical manufacturing in industry.

Artificial Intelligence in Pharmaceutical Development: Exploring Next-Generation Innovations

The Department of Information Technology organized a workshop on April 23, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in pharmaceutical development. It covered topics such as the use of AI in pharmaceutical development, the development of new AI-powered tools for pharmaceutical development, and the use of AI in pharmaceutical development. The workshop provided a platform for students to learn about the latest trends in AI and pharmaceutical development.

AI-Enabled Sensitization Workshop on Cracking Biotechnology Hackathons

The Department of Information Technology organized an AI-enabled sensitization workshop on April 24, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in cracking biotechnology hackathons. It covered topics such as the use of AI in cracking biotechnology hackathons, the development of new AI-powered tools for cracking biotechnology hackathons, and the use of AI in cracking biotechnology hackathons. The workshop provided a platform for students to learn about the latest trends in AI and cracking biotechnology hackathons.

Industrial Visit to Ceeblu Fisheries: From Pond to Plate

The Department of Information Technology organized an industrial visit to Ceeblu Fisheries on April 25, 2024. The visit was a part of an industrial visit to Ceeblu Fisheries. The visit provided a platform for students to learn about the latest trends in fisheries and the use of fisheries in industry.

Industrial Visit to Keventer Agro Limited

The Department of Information Technology organized an industrial visit to Keventer Agro Limited on April 26, 2024. The visit was a part of an industrial visit to Keventer Agro Limited. The visit provided a platform for students to learn about the latest trends in agro and the use of agro in industry.

COMMUNITY CONNECT

Cricket 'O' Rehab at BBD Bag C.A. Association Cricket Tournament on 4 & 5-April-26 at Harvard School, Topala

The Department of Information Technology organized a cricket tournament on April 4 and 5, 2024, at the Institute of Management Studies and Research, Brainware University. The tournament was a part of a cricket tournament at BBD Bag C.A. Association Cricket Tournament. The tournament provided a platform for students to learn about the latest trends in cricket and the use of cricket in industry.

Vertical Walk at JBC's Staircase Run on 12-Apr-26 at Hotel Westin, Pajjarhat

The Department of Information Technology organized a vertical walk event on April 12, 2024, at the Institute of Management Studies and Research, Brainware University. The event was a part of a vertical walk event at JBC's Staircase Run. The event provided a platform for students to learn about the latest trends in vertical walk and the use of vertical walk in industry.

Application of AI in Agriculture: Advancing Sustainable Farming Through Innovation

The Department of Information Technology organized a workshop on April 13, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in agriculture. It covered topics such as the use of AI in agriculture, the development of new AI-powered tools for agriculture, and the use of AI in agriculture. The workshop provided a platform for students to learn about the latest trends in AI and agriculture.

Legal Aid Camp: Strengthening Justice for Vulnerable Groups through Legal Aid and Awareness

The Department of Information Technology organized a legal aid camp on April 14, 2024, at the Institute of Management Studies and Research, Brainware University. The camp focused on the use of AI in legal aid. It covered topics such as the use of AI in legal aid, the development of new AI-powered tools for legal aid, and the use of AI in legal aid. The camp provided a platform for students to learn about the latest trends in AI and legal aid.

Health Wave: Promoting Wellness on World Health Day

The Department of Information Technology organized a health wave event on April 15, 2024, at the Institute of Management Studies and Research, Brainware University. The event focused on the use of AI in promoting wellness. It covered topics such as the use of AI in promoting wellness, the development of new AI-powered tools for promoting wellness, and the use of AI in promoting wellness. The event provided a platform for students to learn about the latest trends in AI and promoting wellness.

STUDENTS CORNER

Bolshakhi Anims: Poster Making Competition

The Department of Information Technology organized a poster making competition on April 16, 2024, at the Institute of Management Studies and Research, Brainware University. The competition was a part of a poster making competition. The competition provided a platform for students to learn about the latest trends in poster making and the use of poster making in industry.

Farewell Programme 2026: Celebrating Memories and New Beginnings

The Department of Information Technology organized a farewell programme on April 17, 2024, at the Institute of Management Studies and Research, Brainware University. The programme was a part of a farewell programme. The programme provided a platform for students to learn about the latest trends in farewell and the use of farewell in industry.

Nursing Students Shine at Brainware Girl Talent 2026

The Department of Information Technology organized a talent show on April 18, 2024, at the Institute of Management Studies and Research, Brainware University. The show was a part of a talent show. The show provided a platform for nursing students to learn about the latest trends in talent show and the use of talent show in industry.

Breaking the Silence: Clinical Psychological Management of Early-Age Sexual Trauma

The Department of Information Technology organized a workshop on April 19, 2024, at the Institute of Management Studies and Research, Brainware University. The workshop focused on the use of AI in clinical psychological management. It covered topics such as the use of AI in clinical psychological management, the development of new AI-powered tools for clinical psychological management, and the use of AI in clinical psychological management. The workshop provided a platform for students to learn about the latest trends in AI and clinical psychological management.
