It is my pleasure to announce the publication of Volume No. 7 and Issue No. 2 of *Brainwave: A Multidisciplinary Journal.* The articles in these pages do not shy away from the demand, namely quality research clubbed with novel idea. Some papers open new lines of enquiry while others consolidate and clarify debates, which have gathered over years. I am particularly overwhelmed by the interdisciplinary content visible across some of the articles. We remain committed to standards, clarity and the quality of the content.

Journals exist to serve their readers. If the articles in this issue sharpen the research work or future study of the readers, it becomes clear that this issue has done its job successfully.

I extend my gratitude to our authors for enriching this issue with their novel research work, to our reviewers for their meticulous and voluntary service and to the editorial board and publishing team for ensuring timelines without compromising quality.

Finally, I do hope that readers will enjoy this issue and get their queries duly addressed. In this context, their citations, debates and applications will add life to the pages.

Prof. (Dr.) Sankar Gangopadhyay

Vice Chancellor (Actg.), & Chief Advisor Research, Brainware University, Barasat, West Bengal, India.
