New No. 8, 2nd Street, Kolkata – 700 099

Subject: Collaboration between Brainware University & CRY.

Madam,

We would like to bring to your kind notice that **Brainware University** which is formed by the Gazette Notification of the Govt. of West Bengal, India (in 2016) is one of the leading **UGC recognized** private universities in West Bengal, providing 50+ programmes in diploma, undergraduate, postgraduate and Ph.D. levels at an affordable cost. We at Brainware University, not only focus on academics but also frequently participate in various social outreach activities, especially in villages. Keeping up with this vision, we want to expand our focus towards children through various "Children Centric Outreach Program" with the support of CRY. Our main focus will be the children from the underprivileged families. We are looking for your enduring support given your expertise in the field of child rights. Together we can conduct various activities like conducting workshop cum awareness program on health and hygiene, scientific and technological awareness and its applications to real life problems, child sexual abuse; university visits for children; conducting school dropout survey and doing the needful to put them back in the mainstream and many more. Apart from these we can work together in various projects funded by various government/non-government agencies regarding children.

With respect to the above context, we would like to have a formal meeting with you to explore in detail all the possibilities to work together by building a long term relationship and working towards the common goal. We can also sign a MOU with CRY in near future.

Thanks and regards

Ms Mahua Pal
